

Hazardous Materials Shipment Solutions
Expertise, processes, technology and
personal commitment with every shipment

A YRC Worldwide Company

Damage-free Delivery

Expertise and procedures for hazardous goods.

Preparing your product for transit

Whether it's on-site analysis of your shipping needs, help answering general packaging questions, assistance with shipping document compliance, marking, labeling, placarding, or Canadian cross-border regulations, Holland has a team of dedicated employees trained and experienced in shipping hazardous goods. Call the **Chemical Helpline (800.395.5446, Option 2)** for help with your questions.

Environmental sustainability

Holland shares your concern for our environment. The efficiency of our network, as well as our waste reduction and recycling practices, help protect and preserve the environment. In addition, Holland parent company, YRC Worldwide, was a founding member of the U.S. EPA SmartWay™ transportation partnership and recipient of the EPA's 2006 SmartWay Environmental Excellence Award for leadership in conserving energy and lowering greenhouse gas emissions. For more information, visit **Destination > Green at yrcw.com**

In the event of an incident

While Holland has an impressive damage-free record, we are fully prepared to handle emergencies. One call to the **Chemical Helpline (800.395.5446, Option 1)** immediately brings on board a nationwide team to determine safety procedures, evaluate the associated risks, determine the appropriate course of action, and provide guidance or directly manage the cleanup process.

Quality Handling

Training and technology for peace of mind.

Driver excellence:

Check and you will find the hazmat endorsement on the license of your Holland driver. In fact, all Holland drivers are compliant with DOT hazmat training. In addition, over one third of our linehaul drivers attained the impressive million-mile mark without a preventable accident.

Tracking and tracing:

Online tracking of your shipments is easy and tells you everything you need to know about the status of your shipment, including details such as pickup date, scheduled and actual delivery dates, product detail and who signed for the shipment.

Forklift expertise:

To avoid product damage on the dock, while loading/unloading shipments and while in transit, all Holland operators are thoroughly trained in proper moving and securing techniques for hazardous goods.

Freeze Protection:

As chemicals become more susceptible to freezing, mark your shipments and bills of lading **“Protect from Freezing.”** Holland specialized freeze-protection services include:

- Pickups Monday through Friday for all direct-point shipments
- Technically-engineered and environmentally-friendly CargoQuilt®* insulated covers available when and where you need them
- Warm rooms for weekend use
- Most next-day lanes in our service area, further reducing the likelihood of freezing

* A registered trademark of Q Sales & Leasing L.L.C.

800-395-5446 - Chemical Helpline for hazardous material compliance questions and 24-hour emergency response
